(a) Each order is needed
learning-value gap $|E_P - E_Q|$
order N
scalar witness (26):
lower moments equal
parity witness (27):
all degree < N moments equal
$N!/(2^{N-1}N^N)$
(b) Moment count is exact
18/18 equal
(exact integer rank)
rank of monomial matrix on grid
C(k+N, N)
k=1
k=2
k=3
k=4
y = x
(c) Fewer than $2^k - 1$ features: error 1
worst-pair discrepancy
number of nonconstant features d
k=1
k=2
k=3
k=4
full interface
(C9 assertion, PASS)
Exact finite computations.
