(a) Telescoping on a 3-state process
drift contribution
round t
Σ c_t = L(0) − L(S) exactly
-0.119081 = -0.119081
final gap = -0.119081
bound (15) = 0.119081
(b) One-boundary equivalence (16)
expected final return
response
separating intervention
P
Q
(c) Cancellation witness
final gap = 0, Σ|drift| = 2
